

Full size perfect design ekey integra, 45 x 90 mm

” So that you can **wait on**
your wife hand and foot “

ekey home integra

Easy and secure access with finger scan

Open your front door easily and conveniently with ekey home integra.

ekey home integra combines the sophisticated finger scan technology of the market leader elegantly and conveniently with your front door. The integrated finger scanner offers easy access without keys, codes or cards. The control panel is extremely compact and is securely located in the door leaf.

Elegance, convenience and security all in one – ekey home integra:

Your finger is the key

SIMPLE

Open doors and gates or activate the alarm system with only one finger swipe. Fingerprint enrollment can be performed without the need for a technician or PC.

CONVENIENT

The key is literally always in your hands. The intelligent software learns with every use and recognizes the growth of child fingers and the alteration of user habits.

SECURE

Your unique fingerprint is much more secure than a key which can be either stolen or lost. The system cannot be manipulated from outside.

1) Gates

The robust finger scanners are designed for outdoor use.

2) Garage

The transponder is in the car - the finger scanner next to the garage door

3) Intercoms

To be integrated into the existing system, or ready-made models to be found in stores

4) Front doors

Functionality and design are combined in an ideal way

5) Alarm systems

Arm or disarm your system with a finger swipe

6) Safes

Higher security than any code

7) PC

No more passwords required

8) Weapon cabinet

Safe, reliable safe-keeping

9) Security zone

e.g. home office, panic room

10) Elevator

ekey home integra

Enjoy it to be „key-free“

TECHNICAL SPECIFICATIONS

	ekey home integra	ekey home 2 integra
Field of application	Private homes	
Number of storable fingerprints	99	
Relay 42 V, up to 2 A	1	2
